Introduction

This book compiles 200+ high-potential, faceless-friendly video niches. Each section includes:

- A unique, category-specific introduction
- Beginner-friendly launch advice (tools, setup)
- Practical content styles and growth/monetization tips
- 15 curated niche ideas (original + expanded)

All ideas are designed for voice-over, screen recording, stock footage, animations, or hands-only visuals — no face required.

Chapter 1

Educational Content

Turn complex knowledge into bite-sized, visual lessons — perfect for faceless creators who love research and clear narration.
